

Vacancy – M/F/X  
Technical Expert

## Come and hit the gas at the EXMAR Group in the position of Technical Expert (Mechanical Engineering)

The EXMAR Group is currently looking for a Technical Expert to reinforce the Technical team in Antwerp.

### Who we are and what we do

The EXMAR Group is an international player in the oil and gas industry. Our core activity includes the transport and transformation of oil and gas (and derivate products) over sea. More than 1400 seafaring crew and 250 shore-based staff daily join forces to provide our clients the best service and offer them innovative solutions. Together we make sure the world is supplied with gas which energizes both them and ourselves!

### Your role in the team

To provide technical expertise in the selection of machinery and equipment for our newbuilding and conversion projects. You cooperate together with the project manager and report to the Chief Technical Officer of the Group.

Your responsibilities and tasks include:

- Obtaining a good understanding of the working principles and maintenance requirements of the machinery and equipment installed on assets built and operated by Exmar;
- Detailed review and approval of engineering deliverables and drawings related to the machinery part of our newbuilt assets and check if these are in line with the correct quality standards;
- Engage in discussions with several stakeholders, such as technical superintendents, contractors, equipment suppliers or shipyards to ensure the equipment or machinery which is selected is best technical/economical choice for the project;
- Stay up-to-date with the latest machinery & equipment developments and collect operational feedback from EXMAR Shipmanagement to implement lessons learned and enable continuous improvement.
- Support to the Project Manager in the development phase or conceptual design phase for new ships or floating terminals in the selection of the proper machinery & equipment.

## Your profile

- Master of Science/Engineering (Naval Architecture or Mechanical Engineering);
- Minimum 5 years of relevant work experience;
- Extensive knowledge of major equipment used on board ships or offshore floaters;
- You are able to understand the way shipyard engineering teams are working and guide them in the right direction;
- You are able to translate the requirements of the internal and external stakeholders into (innovative) solutions and select the machinery or equipment which is fit for purpose;
- You work autonomously in a team and remain flexible to perform tasks which are outside the job scope;
- Fluent in written and spoken English.

## Our offer

At EXMAR you operate a very international, dynamic and, innovative environment. With us each working day looks different. We offer a competitive salary, supplemented with a nice package of fringe benefits. Since we consider personal development and career planning important, additional in-house and external training is supported.

You will be located in the Head Office in Antwerp. Regular travel to shipyards or to our Clients will be required.

## Convinced?

If interested, let us know by sending an email with your CV and cover letter to [hrprojects@exmar.be](mailto:hrprojects@exmar.be). We will get back to you to plan a first interview.

Good luck!
